

Dear Sir or Madam:

As a former Military Intelligence Army Officer and seasoned technologist with 30 years of technology experience, I bring strategic thinking with practical, hands-on execution. I embrace new challenges and always focus on delivering state-of-the-art solutions in a timely and cost-efficient manner. More importantly, I empower my teams to think outside the box, to be inventive, and to create without limitation. Doing so allows technologists to dream big but deliver pragmatically.

I drive corporate technology strategy and have had the pleasure of building products, infrastructure, and teams around start-ups/re-launches to Fortune 100 companies, always leveraging my strong technical background to do so. I have 30 years of experience building and managing software engineering, testing and infrastructure teams while leading efforts around building, testing, deploying, and managing cloud, web, mobile, mainframe, and distributed systems topologies. Additionally, I have a solid background in designing and managing SaaS, PaaS IaaS and IoT, on-premises and hybrid infrastructure solutions, e-commerce platforms, big data collection and analytics, near/far-field technologies, deep learning, and artificial intelligence solutions.

I consider myself a people person and mentor. I regularly receive accolades for my dedication and professionalism, and continually receive recognition for my leadership excellence, communication skills, and selfless commitment to improve the quality of the workplace while motivating my subordinate leaders to expand their personal, technical, and educational backgrounds. Not only do I work tirelessly to build/improve internal relationships, but I also always strive to establish deep and long-lasting relationships with vendors and third parties.

The attached resume is a summary of my qualifications. I am happy to meet with you at your earliest convenience to discuss how my background can help improve your organization.

Thank you in advance for your time and consideration. I look forward to hearing from you soon.

Regards,

John F. Shaw  
“Inspire Through Technology”
